

A clear path through a form.

Ask only what is needed. Keep the next action easy to find.

Example preferences

Local form specimen. Nothing is stored or sent.

View name

Give this example a name.

Description (optional)

Save example

START WITH THE TASK

Every field earns its place.

Labels stay visible. Optional information is marked. The action remains available so people can discover and repair errors.

Try the full path

Submit without a name, correct it, then save. Tab through the select, radios and checkbox.

☐ Simulate a save failure

This switch is a testing control, outside the form.

Make the next step clear.

Feedback belongs beside the work. Keep the input when something fails.

Default

Research view

Focus

Research view

A visible outline follows the keyboard.

Read-only

Research view

Can still be focused and copied.

Unavailable

Research view

Explain what makes this available.

Couldn't save this example.

Try again. Your entries are still here.

Try the recovery example

✓

Example ready.

Use a short, accurate confirmation. The interactive specimen makes clear that this is a simulation.

No matching examples.

Try a broader search or clear the filters.

Clear filters

Loading keeps the action's width and label. No spinner is required. Reduced motion removes colour transitions; status text still announces the outcome.

Small symbols. One language.

Functional outlines share a grid, weight and purpose. The logo stays distinct.

Document

16 / 20 / 24

Read at actual size. Use the medium size beside controls, and the small size for compact metadata.

The same outlines inherit light text on dark fields.

Prefer a visible action label. Icon-only controls need an accessible name and a minimum 44px target. Utility symbols never stand in for the Strale logo or become a decoration on every benefit.

Give each idea room.

Set a content budget before choosing a container.

ONE MESSAGE

Make the next step easier.

A short explanation, one useful visual and a clear destination for the detail.

See the composition rules

Opening promise

12 headline words / 32 body words

Benefit section

10 headline words / 40 body words

Marketing card

8 headline words / 24 body words

Result preview

8 headline words / 18 body words / 3 result rows

1

Primary action

Per decision group. Supporting links remain quieter.

1

Reading panel

Inside an atmospheric frame. Never another panel inside it.

0

Automatic subtitles

Add one only when it supplies a distinct fact the reader needs.

These are authoring defaults, not a reason to hide essential instructions. If content exceeds a budget, edit or move detail to a named destination. Document and review any necessary exception at a narrow width.

Change the composition.

Move between atmosphere, open reading and a focused invitation.

01 / OPENING

Promise beside proof.

A single visual field

02 / EXPLANATION

Let the page breathe.

An open reading layout explains one benefit without another grid of boxes.

03 / INVITATION

Make the next step clear.

One action

Change alignment, scale and information type when the story changes. Use a card grid for comparable choices. Avoid more than two adjacent sections with the same layout, and keep one decorative field per section.

The system, working together.

A website sequence tests the relationship between promise, example and action.

Turn documents into useful data.

Give your agent the fields it needs to carry on with the work.

Explore tools →

Illustrative example

Useful fields

Supplier	Example Studio
Invoice	INV-1042
Total	EUR 480.00

Start with the result you need.

Extract the useful fields from a document, then pass them to the next step in your workflow.

Find a tool for the next step.

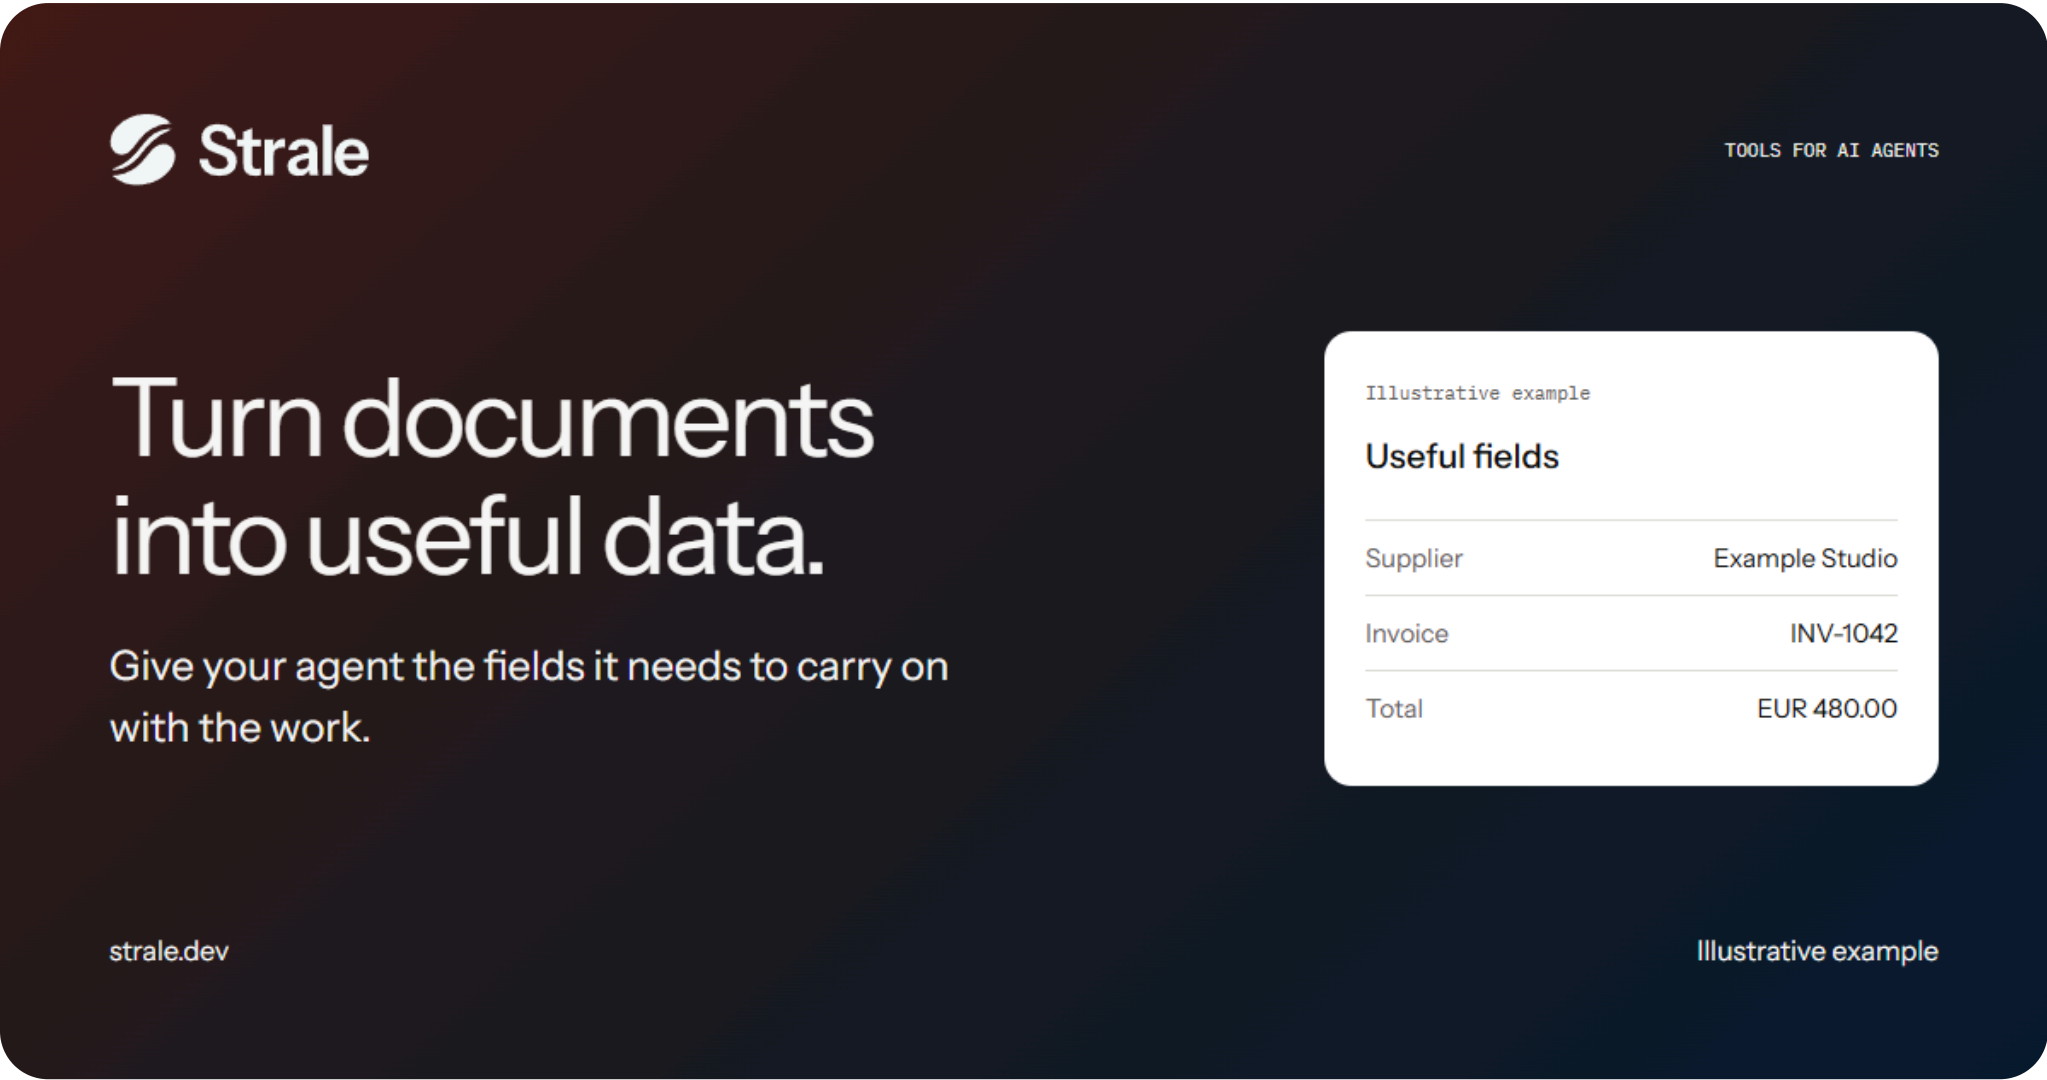

Explore tools →

Open website sequence →

Review the full composition at desktop and mobile widths. The document is an illustrative fixture.

One thought in the feed.

Adapt the composition to the channel. Keep the message short enough to see.

Artwork budget

One headline, one supporting sentence, one evidence object. No pretend button inside a static image.

Open social study →

Caption and alternative text

The accompanying text supplies context beyond the artwork. Alternative text describes both the message and the example.

A useful message, simply sent.

Readable text and a clear destination carry the brand when custom fonts cannot.

Turn documents into useful data.

If your agent works with documents, start with the fields the next step needs. This illustrative invoice example shows the idea: a supplier, an invoice number and a total. Explore the tools to find a fit for your workflow.

Strale

EMAIL ROLE

Clarity survives the fallback.

Arial carries the body. The retained logo and a compact result example supply recognition without a large decorative background.

Subject: A useful starting point for document work

One primary destination. A plain-text companion. This is a browser composition study; it still needs real mail-client and sending-context checks.
